Give your brain a treat with some neural candy.
- 12 Speak your brains**
These pages are a soapbox made out of Linux.
- 16 LV on tour**
Manchester: home of the new Industrial Revolution.
- 28 Group test**
Your machete to cut through the jungle of text editors.
- 46 Interview**
We track down 3/4 of the Raspberry Pi education team.
- 108 Masterclass**
Control FTP with FileZilla; control everything else with SSH.
- 112 On your DVD**
Every single graphical desktop from Mageia 4.
- 114 My Linux desktop**
At home with Ubuntu engineering manager Alan Pope.

TUTORIALS

74 Bug reports: help make free software better

If you do it right, getting bugs fixed can be an important part of free software development.

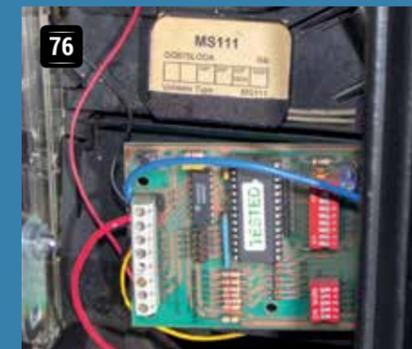

82 Old code: Grace Hopper and UNIVAC

How to program on a machine that weighs more than a double-decker bus.

92 UEFI: The new world order of booting

Boot Linux without Grub or a BIOS.

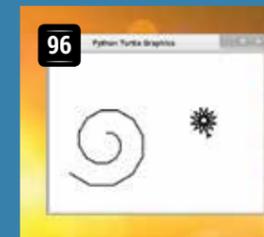

76 Raspberry Pi & MAME: build an arcade machine

Play the games of your youth* without squandering all your pocket money. *Graham's youth

86 KDE: configure the hell out of your desktop

The defaults in KDE are an affront to taste and decency – so fix it and make your life better.

96 Python: Draw patterns with recursion

Write better code with fractals.

100 Code 101: Secure key exchange

Lasers, maths and cryptography.

102 Linux: Write your first kernel module

It's not just for angry swearsy men.

REVIEWS

20 Dell XPS 13 Looking for a new Linux machine, but don't want a heap of plastic rubbish? Step right this way!

22 Retrode Dust off your collection of games cartridges – the Retrode has arrived to imbue them with new life.

23 Krita 2.8 Now Windows types can use KDE's excellent image editor. That's great, but is there anything new in 2.8 for us?

24 PyBorg Your dream of controlling an underground robot city has just come one step closer to becoming reality.

25 SolydXK Based on Debian? Yawn. A third way between timed and rolling releases? Now we're interested...

26 Books Computing in the UK, then and now, plus a small dose of Arduino and a huge heap of Raspberry Pi.
