REGULARS

- 06 News**
Sad times for *Minecraft*, *Shellshock*, and how *LibreOffice* is winning.
- 08 Distrohopper**
The spirits of KDE 3 and Gnome 2 live on – and for the tinkerers, there's Gentoo.
- 10 Gaming**
What's been keeping our trigger fingers twitching this month.
- 12 Speak your brains**
Send us your considered thoughts, that we may share them with the world.
- 16 LV on tour**
Only one stop on the tour today – PyCon UK, home of silliness, cheese and indentation.
- 26 Kernel parameters**
Tweak the Linux kernel for added performance and extra features.
- 56 Group test**
For when you just want to get work done and go home, the humble office suite is here.
- 62 Subscribe!**
Get a shiny magazine every month and access to our archive of content.
- 64 Core technologies**
Control what your users can and can't do with pluggable authentication modules.
- 68 FOSSpicks**
The freshest, free-est and some would say hottest picks the internet can offer.
- 110 Masterclass**
Now that it's finally legal in the UK, rip your CDs from the GUI and the command line.
- 114 My Linux desktop**
Inside the lair of Fabian A Scherschel, Linux Outlaw and security chap for Heise online.

40

Tim O'Reilly

Why DRM is evil, print is hanging on, and open source is as important as ever.

30 MAKER FAIRE
Need inspiration for your next project? Get out there and see what other people are doing!

38 FAQ: SYSTEMD
How a replacement for Linux's startup scripts is taking over the world and making Slashdot angry.

34 GNOME
What next for the Gnome Foundation? We spoke to its former executive director to find out.

TUTORIALS

Tox: Encrypted peer-to-peer communications

Chat without any government spooks listening to you.

Python: Write a simple Twitter client

Connect your application to the weird world of social media.

82 To neutralize an acid, add some alkali to get salt and water:
 $2\text{KOH} + \text{H}_2\text{SO}_4 \rightarrow \text{K}_2\text{SO}_4 + 2\text{H}_2\text{O}$

Benzene (C_6H_6) looks like this:

Latex: Compose beautiful text

The layout tool for the über geek isn't as hard as it looks.

Shellshock: Breaking into Bash

How the scary security flaw works. Now update!

OpenMediaVault: NAS for everyone

Get network attached storage the easy, Linuxy way.

Cyrus: Build your own mail server...

... and implement bespoke antivirus and spam checking.

96 Python: Calculate fractals
Mandelbrot set on the starboard bow!

104 Code ninja: Unit testing
Catch mistakes before they happen.

106 EDSAC and David Wheeler
The birth of the subroutine.

REVIEWS

48 **Kobo Aura H₂O**
An e-reader you can safely read in the bath – oh look, there's an EPUB version of Linux Voice!

50 **Geary 0.8**
Take an email client, then make it as simple as it can be, but no simpler. That's Geary.

51 **Hover**
Control your Pi with hand gestures, like a tiny ARM-powered theremin PC.

52 **Gnome 3.14**
The elegant desktop has refinement and polish – is it enough to tempt us back?

53 **MoPi**
For hacking on the road, this power adaptor and monitor for Raspberry Pi is jolly useful.

54 **Books** A man will turn over half a library to make one book. We've made a start...
