2015 THE YEAR OF LINUX

The future of Free Software, as told by the movers and shakers who are making it happen.

42

Lennart Poettering

He's not the messiah; he's not even a naughty boy. He's just a man trying to make Linux better for everyone.

ASTROPI

28 ASTRO PI
Kids in the UK are getting the chance to send code into space. We're more than a little bit jealous.

30 INSIDE THE EFF
Meet some of the absolute heroes who are fighting to protect your digital rights. We salute them!

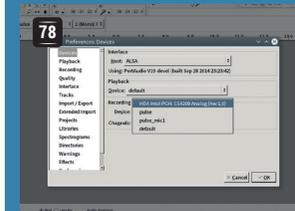

38 LINUX MALWARE
Laugh at the feeble attempts of internet miscreants to exploit the linuxvoice.com servers.

REGULARS

- 06 News**
Why yet more state control is the wrong response to terrorism.
- 08 Distrohopper**
Ubuntu Core, Sparkey and Clonezilla, plus a look back through time to Fedora 1.
- 10 Gaming**
Enjoy a fictionalised, gamified version of the siege of Sarajevo. Er, no thanks.
- 12 Speak your brains**
We've done wrong, but we've also done right, which kind of balances out. Thanks!
- 16 LV on tour**
The Global Learning Xprize, and the localised learning Pi Wars share these pages.
- 34 Inside the Pi factory**
Brave Sir Les bravely rides to Wales, where the smell of solder hangs heavy in the air.
- 40 FAQ... Ubuntu Core**
Provision virtual systems with a tiny, easily scalable version of Ubuntu for phones. What?
- 58 Group test**
Remote desktop clients – control your machine without even being in the same room.
- 64 Subscribe!**
Invest in the irreplaceable quality of Linux Voice, for as little as £38 a year. Bargain!
- 66 Core technologies**
For one last time Dr Brown delves under the surface of the Internet Protocol.
- 70 FOSSpicks**
The best free software around, all as free as a little lamb gambolling on a hillside.
- Masterclass**
110 Hide the contents of your emails from snoopers with GUI and command line encryption.
- 114 My Linux desktop**
The den of Ben Nuttall, human and part of the Raspberry Pi Foundation's education team.

TUTORIALS

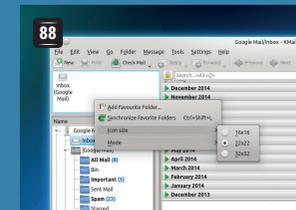

78 Audacity: Make voice recordings
Add your voice to the sound of the Linux Voice audio edition.

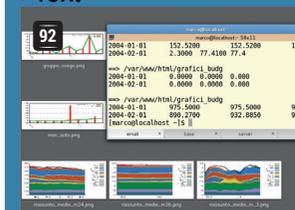

80 Python 3: Build a password checker
Use programming tools to test the strength of your passwords.

84 OpenELEC: Build a media centre
This superb media distro will make you love your television.

88 Linux 101: Configure KMail
Take back control of your inbox with KDE's email application.

92 Regular expressions: work less, work smarter
Manipulate text strings, find things and much, much more.

96 Olde Code: From Unix to Linux
How we got from Bell Labs to millions of smartphones.

100 Arduino: Control cheap hardware
Write your own Arduino library.

104 Code Ninja: RESTful APIs
Extract data from the web.

REVIEWS

50 Henry Audio USB DAC 128 Mk II
Convert digital music to analogue output. Even One Direction sounds better.

52 Fedora 21
Red Hat's community distro has three new flavours to try and a tasty Gnome desktop.

53 Seafile
This proprietary solution promises the convenience of the cloud without the snooping.

54 Kodi
Unleash your inner Tarantino by watching lingering shots of toes using free software.

55 VMware Player 7
Spin up machines with up to 64GB of RAM with the latest from this virtualisation app.

54 Books Now with infinite battery life, high resolution and no screen glare – books!
